

The Mortgage Works on mte means more choice for brokers.

At The Mortgage Works (TMW) we're driven by common sense, from the specialist products we develop to the way we work with intermediaries. So when brokers decide to place business with TMW we want to make sure they have as much choice in how they do so as possible.

TMW Online, with its time saving features such as dynamic form filling and case cloning, already provides a fast and straightforward way to submit applications. The web-based system cuts out unnecessary paperwork and gives you flexibility about where you work.

To complement that way of working with TMW, we are delighted to announce that brokers can now submit applications via the Mortgage Trading Exchange (mte), the UK's only common electronic trading platform. Many brokers are already using mte for new business, so it makes sense for us to give them the option of submitting TMW business through the same system.

Like TMW Online, mte offers some great time saving features. For example, there's no need to provide proof of income or payment history, so DIPs are quick and easy. Plus, your DIP can then be seamlessly moved into a full application. The mte software is designed to be installed on your computer, which means you can complete the forms offline. (You only need to go online to submit the application.)

If you're already using mte, getting started with TMW business is easy. Just call 0845 601 0763 or visit TMW Online. You'll need to have your mte login details to hand (user ID, password and PIN). Within minutes you'll be ready to register new TMW business on mte.

Whichever electronic system you choose, you still get the same excellent support and customer service from us. So with TMW, you get the best of both worlds – fast, efficient and straightforward ways to do business, online and offline. To find out more about ways to work with us visit www.themortgageworks.co.uk/mte.

**TMW now
available via mte.
Work the way
you want to.
More choice.
More common
sense.**
